

ARNO – IZVORIN AGRICULTURAL HOLDING PRESENTATION

1. GEOGRAPHICAL SITTING

Geographically, the Arno-Izvorin Agricultural Holding has the following coordinates:

- Located in the Western Plain of Romania;
- It is located in Arad County and belongs to the administrative territory of Arad and Vinga;
- It is located about 6 km away from the residence county, Arad;

2. ACCESS POINTS

From the access point, Arno-Izvorin Agricultural Holding is in a very good position, presenting the following benefits:

- It is very close to the Nadlac-Arad-Timisoara, more precisely at a distance of 4 km from Interchange AradSouth;
- The operation is served by the national road DN69;
- There are many roads in the structure of the Arno -Izvorin Agricultural Holding which provide easy access to each plot;

3. HYDRAULIC NETWORK

From the point of view of irrigation, the Arno-Izvorin Agricultural Holding is equipped in the following way:

- It is served by a hydraulic network of buried pipes, which feeds the pivot type irrigation system and open channels which provides water at different points of the Agricultural Holding;
- The pivot installations are in the range of 300-500 meters;
- The above mentioned system ensures the irrigation of 50% of the area of the holding, so about 1000 ha.

4. SOLID FERTILITY AND CULTURE DESTINATIONS

In terms of fertility, the soil in this area has the following features: It falls into the chernozem category, with high fertility is easily adaptable to mechanical-agricultural work in any condition weather.

The most important factors determining the choice of crops for this area, are the following:

- Positioning of the Holding in the Western Plain of Romania, which is the second agricultural area of importance for the country;
- The exploitation takes place on a fallen land with the shape geometric rectangle and a total area of 2000 ha ;
- Agricultural potential very high due to soil fertility and advanced performance technology.

Considering:

- Geometrical shape and degree of blending;
- High soil quality;
- Complex Irrigation Infrastructure;

The Arno-Izvorin holding can have **multiple destinations**, up to the most specialized, including the production of seeds, vegetables or other special crops for the food industry, which implies the use of state-of-the-art technology, all of these factors guaranteeing one safe and consistent income.
